source of truth for all your issues and help your team prioritize against their big picture goals, while continually delivering value to your customers.

Identify and capture bugs

See all your bugs in one place. Once you've identified a bug, capture its details by creating an issue from anywhere in your project. Each unique issue type can have its own custom workflow.

Assign and prioritize

Once captured, bugs can be ranked and prioritized based on importance, urgency, and your team's workload capacity. Assigning bugs is easy and can be accomplished in only a few keystrokes from the issue.

Track bugs to done

The screenshot shows the top section of a GitHub repository page. At the top, the repository name 'Natural Natures Mart(Nature)' is displayed in a large, bold font, followed by the description 'Software project'. Below this, it states 'You're on the Free plan'. A prominent blue button with a plus icon and the text 'UPGRADE' is visible. Below the button is a link 'Back to project' with a left-pointing arrow icon. A horizontal line separates this section from the 'Filters' section below. The 'Filters' section includes a list of filter options: 'All issues' (which is selected and highlighted in blue), 'My open issues', 'Reported by me', 'Open issues', 'Done issues', and 'Viewed recently'.
